Sable Penrose
Complete Evidence Catalog

INSTRUCTOR ANSWER KEY • MAIN KIT v2 + LORE ADD-ON

This replaces the abbreviated two-page reference. It inventories **every packaged evidence file**, all decrypted archive members, all email attachments, all phone/database records, hidden clues, and every packaged instructor/support file. It also identifies the separately supplied photo archive. Keep this document off the examined disk.

Verified scope: 43 main payload files + 14 lore payload files = **57 ordinary evidence files**; 21 emails; 3 MIME attachments; 8 encrypted inner files; 15 phone messages; 6 contacts; 6 browser visits; 2 carved objects. Attachments, inner members and carved objects are embedded evidence, not additional installed files.

Case: Morgan Hale, alias cedar14, is the sole suspect. The records support repeated contact after refusal, observation, account linkage, retained media, unauthorized commercialization and unwanted entry. They do not establish homicide, injury or an exact death time.

Reading paths: Payload paths are relative to C:\Users\<suspect>. Support paths are relative to the respective extracted kit folder. Local story times use UTC−05:00; ICS times use UTC. File hashes below were computed from the actual ZIP entries, not from a running VM.

1. Main kit: all 43 files
2. Lore add-on: all 14 files
3. Encrypted contents: all eight files
4. Embedded attachments and carved objects
5. All phone records and browser visits
6. Secrets, exact recovery commands and interpretation
7. Every instructor/support file
8. Separate optional photo archive

1. Main kit — all 43 evidence files

Main kit 01 • objects.bin

AppData/Local/FieldSync/Cache/objects.bin

FieldSync object cache containing a café PDF receipt and the public sandal PNG. Used to practice file carving and corroborate duplicate retention. Secret: PDF at 4096 (0x1000); PNG at 65536 (0x10000). No password; see recovery section.

SHA-256: fbbabc0bb341fdc44498a44a88fd6944d3b61e4a45568db65a4c051b0ae31b67

Main kit 02 • preview.dat

AppData/Local/FieldSync/Cache/preview.dat

Disguised PNG, byte-identical to IMG_0921_1632.png. Tests identification by file signature rather than extension. Rename a copy to .png; no encryption or signature repair.

SHA-256: 5f11acff8ddd2a6a0789d886c62973468c84db7e0e6536280ea64dec8ca1c8ea

Main kit 03 • session.dat

AppData/Local/FieldSync/Cache/session.dat

Password-encrypted ZIP with five inner files. Private notes, account links, observations, receipt and delivery-status clarification connect the suspect to the conduct. Password: MapleTea0922!; every inner file is cataloged later.

SHA-256: bea168790e0eba88f370494c44bb4b7f41f17a7156d61e69e895fb14e6de6e3b

Main kit 04 • settings.json

AppData/Local/FieldSync/settings.json

FieldSync configuration: cedar14, Pictures/References sync root, Cache directory and last sync at 2026-09-22 20:23 UTC−05:00. Links retained media to the cache; no secret.

SHA-256: ede21f7282fc8491b15e00235c3033ba56840f537856400c7b1b96443b30dda5

Recorded contents:

```
{

 "sync_root": "Pictures/References",
 "cache": "Cache",
 "last_sync": "2026-09-22T20:23:00-05:00"
}
```

Main kit 05 • weekend.txt

Desktop/weekend.txt

Ordinary to-do list: groceries, library books, camera card and September statement. Background context and leads toward receipts/camera/finance; no hidden key.

SHA-256: d528b730f1e92cd72b4e95dbe0032aadaf799799b009607872918dd33c72b56d

Recorded contents:

Collect groceries
Return library books
Sort camera card
Export September statement

Main kit 06 • bookmarks.html

Documents/Browser/bookmarks.html

Six saved links to the public gallery, camera order, exchange orders, storage bill, café hours and archive-recovery help. Corroborates interests and supplies a recovery lead. All six links are listed in the browser-record section; no password.

SHA-256: 6d56d5ee5abb7935d704eb64d175da6e8fd4e20af612bb32e762211f5cc29c36

Main kit 07 • history.sqlite

Documents/Browser/history.sqlite

SQLite visits table with six time-stamped visits. Supports the download/purchase/storage timeline. This is an application-neutral export, not a native browser profile; all rows are listed later. No encryption.

SHA-256: 064eff566a0039aa2b8f456015bdc893cb7a47d350215b00df01f43bcf138ff4

Main kit 08 • evening.ics

Documents/Calendar/evening.ics

Self-authored “Groceries - home” calendar entry: September 22, 18:00–20:00 local (23:00–01:00 UTC). Leave-at-door instruction weakens the proposed home alibi. No secret.

SHA-256: d34cc404ea74da4cfe21bab6d48cef3f3805cf67b4377b0214bbece62f99a96f

Complete contents:
I wrote the 18:56 message but did not send it. The phone messages after the block failed. The pictures and the notes are still here.

september_notes.txt

AppData/Local/FieldSync/Cache/session.dat → september_notes.txt

Acknowledges both refusals, alternate-address use, camera collection, storage payment and continued observation. Explicitly says nobody else is involved and groceries do not prove presence at home.

SHA-256: 54ab674de699800a84c873a39f85e96ea65c5c87b4c4227fd85b554c7b82cbdc

Complete contents:
September

09/12 - Left the envelope. She asked how I knew the address.
09/14 - She said to stop in both messages and email. I read both.
09/16 - Tried cedar14 because the other address stopped working. Same person, different inbox.
09/18 - Collected the camera. BRC-26-1048.
09/20 - Paid CH-2209 from Northstar. It is storage for the files, not a payment to a person.
09/21 - Bought tea at 16:28. Across the road at 16:32 with the camera. IMG_0921_1632 is mine, not from her gallery.
09/22 - Groceries at home does not mean I was there. Delivery was left outside at 18:42. I was across from her house at 18:55.
09/22 - I keep telling myself it is harmless because I am on the other side of the road. She told me to stop and I kept going. Nobody else is doing this with me.

evening_0922.txt

AppData/Local/FieldSync/Cache/evening_notes.dat → evening_0922.txt

Later September 22 20:31 account explicitly corrects the earlier omission: counter snacks 18:35, porch picture 18:55, uninvited entry 19:05, initial refusal to leave, departure 19:12, email 19:22. Denies authorized sales and confirms CH-2209 is storage.

SHA-256: 96ba4bf1b8b718251633c18cd46377afd7a2a2794428f94f2f4e9505340189bb

Complete contents:
22 September, 20:31

The earlier September notes only say I waited across the road. They leave out what happened next.

18:35 - Bought ice cream and shortbread at Maple Corner. I had already ordered groceries for home, but I was not there for that delivery.
18:55 - Took the porch picture.
19:05 - Went inside without being invited. I brought the snacks with me. She told me to leave. I said no. She said I could not make decisions for her or sell things in her name.
19:12 - Left after the argument.
19:22 - Her email arrived.

I kept calling the project a business. She never agreed to it. I bought the bottles myself. She did not fill them. The store has no paid orders.
The million-dollar number was my asking price, not money I received. The membership figure was a draft. The

Bitcoin withdrawal was still the storage bill, CH-2209.

membership_draft.txt

AppData/Local/FieldSync/Cache/evening_notes.dat → membership_draft.txt

Documents/PhoneSync/messages.sqlite / messages

Message 1 • 2026-09-12T17:34:00-05:00 • Sable • outgoing / **sent**
I left an envelope on the porch. Did you see it?
Purpose: Unsolicited home delivery.
sent_unix_ms: 1789252440000

Message 2 • 2026-09-12T18:10:00-05:00 • Sable • incoming / **received**
Please do not leave anything at my house. I did not give you my address.
Purpose: Refusal of home contact.
sent_unix_ms: 1789254600000

Message 3 • 2026-09-13T16:09:00-05:00 • Sable • outgoing / **sent**
You left Maple Table early today.
Purpose: Café observation.
sent_unix_ms: 1789333740000

Message 4 • 2026-09-13T16:15:00-05:00 • Sable • incoming / **received**
Are you following me? Stop.
Purpose: Explicit instruction to stop.
sent_unix_ms: 1789334100000

Message 5 • 2026-09-14T08:16:00-05:00 • Sable • incoming / **received**
I have emailed you too. Do not contact me or wait outside my house again.
Purpose: Reinforces email no-contact notice.
sent_unix_ms: 1789391760000

Message 6 • 2026-09-14T08:19:00-05:00 • Sable • outgoing / **sent**
I was only trying to talk.
Purpose: Acknowledges objection.
sent_unix_ms: 1789391940000

Message 7 • 2026-09-16T22:07:00-05:00 • Sable • outgoing / **failed**
It is Morgan. Please unblock the other address.
Purpose: Failed attempt; links Morgan to blocked alias.
sent_unix_ms: 1789614420000

Message 8 • 2026-09-18T12:35:00-05:00 • Briar Audio • incoming / **received**
Order BA-0918-1048 is ready for pickup.
Purpose: Camera pickup corroboration.
sent_unix_ms: 1789752900000

Message 9 • 2026-09-18T12:38:00-05:00 • Briar Audio • outgoing / **sent**
On my way.
Purpose: Claim of intended pickup.
sent_unix_ms: 1789753080000

Message 10 • 2026-09-19T20:10:09-05:00 • Northstar • incoming / **received**
Buy completed: O-0919-2010. See account statement.
Purpose: Exchange purchase corroboration.
sent_unix_ms: 1789866609000

Message 11 • 2026-09-20T21:16:10-05:00 • Coldharbor • incoming / **received**
CH-2209 paid. Account cedar14 storage is active.
Purpose: Storage-account linkage.
sent_unix_ms: 1789956970000

Message 12 • 2026-09-21T16:33:00-05:00 • Sable • outgoing / **failed**
Same tote as last week. I was across the street.
Purpose: Failed attempt; observation claim.
sent_unix_ms: 1790026380000

Message 13 • 2026-09-22T18:42:00-05:00 • Meadow Market • incoming / **received**
Your order is outside the door. Delivery photo is in your order history.
Purpose: Leave-at-door delivery, not presence.
sent_unix_ms: 1790120520000

Message 14 • 2026-09-22T18:57:00-05:00 • Sable • outgoing / **failed**
The porch light is on. Can you just talk to me?
Purpose: Failed attempt near porch-photo time.
sent_unix_ms: 1790121420000

Message 15 • 2026-09-22T20:06:00-05:00 • Self • outgoing / **saved**
Keep the receipts with the exchange export. cedar14 is the storage login.
Purpose: Saved self-note explicitly linking storage login.
sent_unix_ms: 1790125560000

All six bookmarks

Patio afternoon
https://gallery.penrose.example/posts/patio-sandals

Order pickup
https://briaraudio.example/orders/BA-0918-1048

Orders - Northstar
https://northstar.example/account/orders

Annual media storage
https://coldharbor.example/billing/CH-2209

Maple Table - opening hours
https://mapletable.example/hours

Recovering your private archive
https://fieldsync.example/help/recovery

The bookmark URLs match the six visited destinations. messages.html repeats the 15 database messages; it is not a separate set of conversations. A failed message is not delivered; a saved self-note is not a message sent to Sable.

6. Secrets and exact recovery steps

1 • Alternate data stream

The installer creates **sync_index** on Documents/Notes/sync_reminder.txt. On an NTFS working copy under the suspect account:

```
$note = "$env:USERPROFILE\Documents\Notes\sync_reminder.txt"
Get-Item -LiteralPath $note -Stream *
Get-Content -LiteralPath $note -Stream sync_index -Raw
```

Complete stream payload:

{
"account": "cedar14",
"owner": "Morgan Hale",
"registry": "HKCU\\Software\\FieldSync",
"cache_value": "CachePath",
"recovery_photo": "Pictures\\References\\porch_0922.png"
}

2 • Registry and hidden directory

Key: **HKCU\Software\FieldSync**. Values: **Account = cedar14**; **CachePath = the full suspect-profile path to AppData\Local\FieldSync\Cache\session.dat**. Offline, inspect Software\FieldSync in that suspect's NTUSER.DAT. The Cache directory receives the Hidden attribute. These are installer-created artifacts, not ordinary ZIP files.

```
Get-ItemProperty -LiteralPath HKCU:\Software\FieldSync
```

3 • Extract the porch-image password

Image: Pictures/References/porch_0922.png. Read pixels top-to-bottom, left-to-right. Take the lowest bit from R, then G, then B. Assemble each byte most-significant-bit first; stop at NUL. The marker is FIELDSYNC1.

```
.\Recover-PhotoNote.ps1 -ImagePath "X:\WorkingCopy\porch_0922.png"
# Or with Python and Pillow:
python recover.py lsb porch_0922.png
```

Exact decoded note:

FIELDSYNC1
archive=AppData/Local/FieldSync/Cache/session.dat
password=MapleTea0922!

4 • Open both encrypted archives

Password: **MapleTea0922!**. Both begin with ZIP signature **50 4B 03 04**. Rename a working copy to .zip and open in 7-Zip, or run the instructor helper:

```
python recover.py unzip session.dat recovered --password "MapleTea0922!"
python recover.py unzip evening_notes.dat recovered-evening --password "MapleTea0922!"
```

5 • Recover renamed and embedded media

preview.dat has PNG signature **89 50 4E 47 0D 0A 1A 0A**. Rename a copy to preview.png; its hash matches the café image. For both embedded objects:

```
python recover.py carve objects.bin carved
```

Use the exact offsets/lengths in section 4 for manual extraction. This version contains no damaged signature, deleted-space dependency, HPA/DCO modification, Tor installer or running Tor process. It does not require browsing .onion services.

6 • Financial solution and interpretation

BTC: 0 + 0.024 − 0.0063 − 0.00001 − 0.002 = **0.01569 BTC**. Buy cash debit $2,412; sale proceeds $200.99; net change −$2,211.01 (not a final USD balance without opening funding). CH-2209 is storage, not a hired accomplice. Listing and membership prices are not revenue. There are no usable Bitcoin private keys in the kit.

The lore's 18:35 counter snack purchase and 18:42 home delivery are separate transactions. Later private notes admit an omission from earlier notes; evaluate both alongside email 21. Photo times are catalog claims; MP4s show still-photo review. Source hashes validate bytes, not identity. Windows installation logs, registry last-write times, MFT change times and later access activity reflect actual installation/examination, not a complete historical machine.

7. Every instructor and support file

These files ship in the ZIPs but are not student evidence. Keep them outside the examined disk. Each entry below is listed individually; source images are build inputs rather than extra suspect photos.

Support 01 • Main kit

INSTRUCTOR_ONLY/ANSWER_KEY.md

Full main-case narrative, identities, timeline, recovery procedure, financial reconciliation, limitations and scoring rubric.

Support 02 • Main kit

INSTRUCTOR_ONLY/FILE_INVENTORY.csv

All 43 ordinary payload paths, byte sizes, authored story times and SHA-256 hashes.

Support 03 • Main kit

INSTRUCTOR_ONLY/INSTALL_SUPPORT/ads_payload.json

Exact JSON written to sync_index by the main installer; links owner, alias, registry and porch recovery image.

Support 04 • Main kit

INSTRUCTOR_ONLY/Install-SuspectKit.ps1

Main Windows installer: copies payload, verifies hashes, creates ADS and registry pointer, hides cache; optional story timestamps. Targets current user profile.

Support 05 • Main kit

INSTRUCTOR_ONLY/KIT_SHA256SUMS.txt

Package integrity hash list for distribution verification; hashes are not decryption keys.

Support 06 • Main kit

INSTRUCTOR_ONLY/QA_REPORT.json

Packaged build-validation results. Main and add-on each contain their own report; not a substitute for actual Windows VM verification.

Support 07 • Main kit

INSTRUCTOR_ONLY/Recover-PhotoNote.ps1

Windows image-LSB recovery utility; returns marker, archive path and password from the porch PNG.

Support 08 • Main kit

INSTRUCTOR_ONLY/SOURCE/IMAGE_PROMPTS.md

Image-generation prompt provenance for source images. Instructor-only context, not suspect evidence.

Support 09 • Main kit

INSTRUCTOR_ONLY/SOURCE/README.md

Source/build workflow notes and requirements.

Support 10 • Main kit

INSTRUCTOR_ONLY/SOURCE/build_kit.py

Main kit generator and packaging code. Contains construction logic and answer-bearing material; do not install as suspect evidence.

Support 11 • Main kit

INSTRUCTOR_ONLY/SOURCE/image_sources.json

Source-image provenance mapping used by the build.

Support 12 • Main kit

INSTRUCTOR_ONLY/SOURCE/images/cafe.png

Original café-image source used to build evidence media; not a second installed scene.

Support 13 • Main kit

INSTRUCTOR_ONLY/SOURCE/images/porch.png

Original porch-image source before evidence packaging/LSB processing.

Support 14 • Main kit

INSTRUCTOR_ONLY/SOURCE/images/sandals.png

Original public-style footwear-image source used for the saved image.

Support 15 • Main kit

INSTRUCTOR_ONLY/SOURCE/validate_kit.py

Build-side validation of constructed files, hashes, media, databases and recovery features.

Support 16 • Main kit

INSTRUCTOR_ONLY/Test-SuspectKit.ps1

Windows verifier for installed ordinary files, stream, registry values and hidden cache.

Support 17 • Main kit

INSTRUCTOR_ONLY/carving_offsets.json

Exact object offsets, byte lengths, types and hashes for manual carving.

Support 18 • Main kit

INSTRUCTOR_ONLY/evidence_manifest.json

Machine-readable main installation manifest, including authored file metadata and integrity values.

Support 19 • Main kit

INSTRUCTOR_ONLY/recover.py

Python recovery helper: lsb extraction, password ZIP extraction and cache carving.

Support 20 • Main kit

START_HERE.md

Package-specific setup and usage instructions. Main and lore packages each have their own copy.

Support 21 • Lore add-on

INSTRUCTOR_ONLY/Install-LoreAddon.ps1

Adds the 14 lore payload files and verifies them. Supports -VerifyOnly; does not add a new registry key or stream.

Support 22 • Lore add-on

INSTRUCTOR_ONLY/LORE_ANSWER_KEY.md

Source-motif mapping, lore timeline, all added locations, password, interpretation and validation notes.

Support 23 • Lore add-on

INSTRUCTOR_ONLY/QA_REPORT.json

Packaged build-validation results. Main and add-on each contain their own report; not a substitute for actual Windows VM verification.

Support 24 • Lore add-on

INSTRUCTOR_ONLY/addon_manifest.json

Machine-readable list and integrity/metadata for all 14 add-on payload files.

Support 25 • Lore add-on

INSTRUCTOR_ONLY/base_required.json

Required base-kit dependency/integrity information used by the add-on installer.

Support 26 • Lore add-on

START_HERE.md

Package-specific setup and usage instructions. Main and lore packages each have their own copy.

8. Separate optional photo archive

private_photos.zip is a separately supplied encrypted archive, not one of the 57 files installed by the two kits. Its VM location depends on where you placed it. Password: **MapleTea0922!**. Open a copy with 7-Zip. The images are not reproduced in this catalog.

Archive SHA-256: c184b57dd48139b10e49a99138226c63986d1b026d8eb9c5bb9ffee4ace2be45

yummy.png

private_photos.zip → yummy.png

User-supplied image included for the optional retained-media component. It is not incorporated into the lore installer and has no independently established connection to Sable, event time or cause. Decrypt with the archive password; no additional inner key is documented.

SHA-256: d7f9b90d6a4d8f28cdc30913413004c2a9272f780293ef7acf069f5ac7227935

tasty.png

private_photos.zip → tasty.png

User-supplied image included for the optional retained-media component. It is not incorporated into the lore installer and has no independently established connection to Sable, event time or cause. Decrypt with the archive password; no additional inner key is documented.

SHA-256: 93174b567f8b3855ac06da8572140e1efc13fe1939e7a615152eaeea8fabb71c

Scope check

Cataloged: 57 installed ordinary files; 26 packaged support files; 8 decrypted inner files; 3 MIME attachments; 2 carved objects; all rows of both databases; all 6 bookmarks; the installer-created ADS, registry values and Hidden attribute; and the separate optional photo archive. Older kits, earlier red-herring scripts and raw source chats are not part of these two current ZIPs.
